# How to run Crypterminal

Go to https://crypt-terminal.herokuapp.com and sign in with a GitHub account.

User Manual

1. After signing in with a GitHub account, you'll see a menu that looks like this:

   Fill out all the fields, then select a starting amount for your wallet.

2. You can use the interface below to buy and sell cryptocurrencies directly:
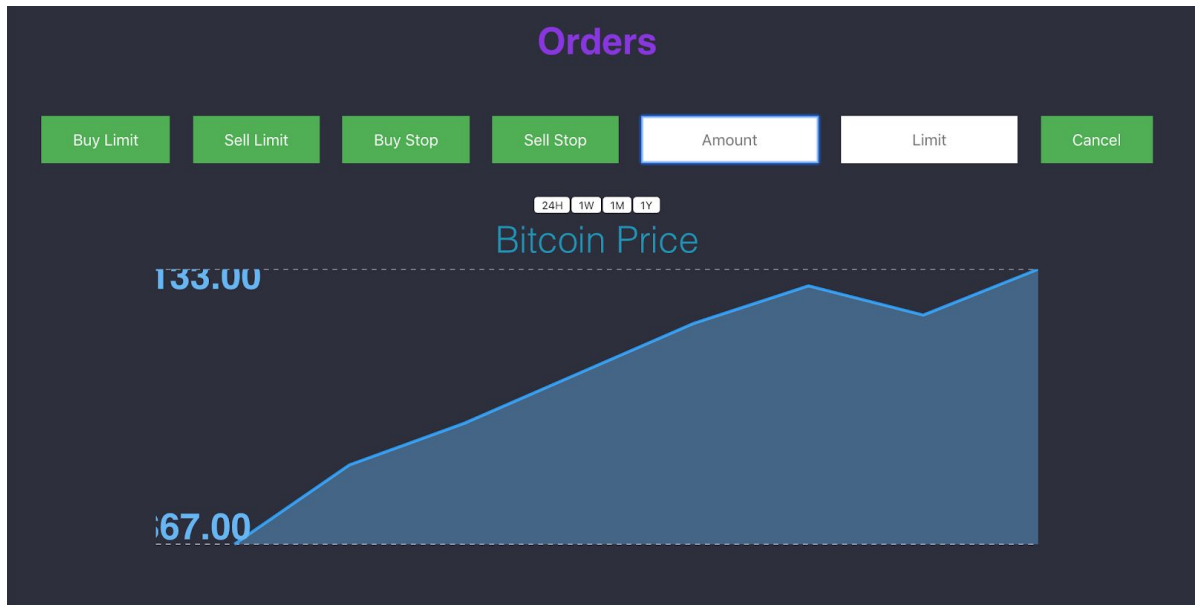

3. The interface below allows Buy Limit, Sell Limit, Buy Stop, and Sell Stop orders:

Orders

| Buy Limit | Sell Limit | Buy Stop | Sell Stop | Amount | Limit | Cancel |

24H 1W 1M 1Y

Bitcoin Price

133.00

67.00

Buy Limit:

    Allows you to buy assets at or BELOW the specified price.

Sell Limit:

   Allows you to sell assets at or ABOVE the specified price.

Buy Stop:

    Allows you to buy assets at or ABOVE the specified price. This is to not buy volatile stocks.

Sell Stop:

    Allows you to sell assets at or BELOW the specified price. This is to stop big losses.

4. At the bottom of the page you can find a Help menu if you have trouble:

| Help Buy Limit | Help Sell Limit | Help Buy Stop | Help Sell Stop |

Recent Orders

buy 35 eth 6230.2378264
buy 3 bit 27516.90293325

Notifications Page

You can also find a History of all Recent Orders, along with a Notifications Page.
